2014 PSAAPG CONVENTION Post-Convention Issue

When time is money, Wellsite Geoscience is money well spent.

Whether you're exploring a basin, producing a well or completing a shale play, time is money. That's why Weatherford Laboratories brings a suite of formation evaluation technologies right to the wellsite. Utilizing mud gas and cuttings, these technologies provide detailed data on gas composition, organic richness, mineralogy and chemostratigraphy in near real time. As a result, operators now have an invaluable tool to assist with sweet spot identification, wellbore positioning, completion design and hydraulic fracturing. We call it Science At the Wellsite. You'll call it money well spent.

Dear PSAAPG Members,

The Bakersfield convention is in the books. It was a great event, exhausting, but really memorable. We should thank a fantastic team: the Convention Committee, for all their efforts, and to the San Joaquin Geological Society for hosting this event. They pulled off a safe, educational, fun, tasty, and dynamic event. Registration reached 652, including about 100 students. The Bakersfield Marriott at the Convention Center did a very good job. The field trips, workshops and short courses were very well presented and attended. The technical sessions were outstanding, with a solid mix of student and professional presenters. The exhibition hall was truly a fully utilized and well attended venue, where the food was excellent (crab, shrimp, oysters and more). The continuous flow of people between sessions and for the posters ensured that the exhibitors had great traffic. The comments from the crowd were very positive.

The visitors from AAPG National were also very impressed with the show. Lee Krystinik (AAPG President), Tom Ewing (VP of Sections), David Dolph (Head of the House of Delegates), and Carol McGowen (Manager of US Sections and International Regions Development) joined for the bulk of the meeting. Lee's talk at the All Convention Luncheon was outstanding. David hosted a House of Delegates meeting, and Tom participated in Technical Sessions. Carol had the AAPG booth at the Exhibition Center. Tom and Carol also joined us for our second annual PS-AAPG Leader Forum, where the Executive Committee presented our views for the issues faced by the Society and how we propose to address them. Thanks to all the folks who attended this public meeting.

I want to provide special recognition to our 2014 Honors and Award Winners for PS-AAPG. As he has done for several years, Bob Lindblom leads the Honors and Awards Committee. He is responsible for assembling a list of potential award winners to be presented to the Ex Comm. We approved the list and the awards were presented at the All Convention Luncheon. The Honorary Life Member awards were presented to Robert D. Hoffman and Stephen A. (Tony) Reid. Distinguished Service awards were given to Bonnie Bloeser, Timothy D. Elam, and Cynthia A. Huggins. The Distinguished Educator award was presented to Janice M. Gillespie, PhD. In addition to these awards, the Teacher of the Year Award was presented to Stephen Kiouses of Bakersfield. Stephen will represent PS-AAPG at the National level. The Van Couvering award students were presented by Mark Wilson of the PS-AAPG Foundation. Students from Bakersfield and Fresno were honored at the meeting. Finally, the PS-AAPG winning IBA team from San Diego State University was presented with an award at the Luncheon and provided with registration for the meeting.

We are looking forward to the 2015 Convention in Oxnard, hosted by the Coast Geological Society. The meeting is May 3-6, 2015 at the Mandalay Beach Hotel and Resort Embassy Suites, and Joan Barminski is the General Chair. I know she was taking a lot of notes in Bakersfield.

As we move into summer, there are two things I am looking forward to doing. Firstly, the election for PS-AAPG officers will be taking place very soon. The list is assembled and will be sent out in May. Secondly, I am looking forward to handing off the Presidential Mace to John Williams. We have been getting together over the past year, and have been participating in monthly telephone conferences with Presidents from all the AAPG Sections. John and I will be getting together with the Executive Committee in June and will have the hand-over in early August.

Best Regards,

Dan

Guy L. Burge

Long time PSAAPG member Guy L. Burge passed away on March 31, 2014, in Incline Village, Nevada. He is survived by his wife of more than 50 years, Linda, son Mark, and daughters Kathleen and Suzanne.

Guy was born June 24, 1938. He graduated from the University of Redlands in 1960. He was California Professional Geophysicist Geologist #8, and California Registered Geologist # 2706. He was a past officer of the San Joaquin Geological Society, having served as Treasurer in 1978-79.

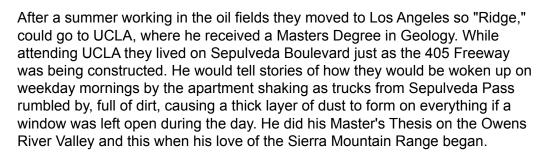

Guy Burge- From SPA

Guy was a well known Sacramento Valley/San Joaquin Valley geologist. He worked for Union Oil Co., Buttes Resources, Capitol Oil Corp., and Stream Energy. In later years, he had his own consulting business, Geoenergy, based in Reno, Nevada. He supported multiple educational efforts in the Reno/Lake Tahoe area, including the Lake Tahoe School.

Thanks to Rich Boyd and the Sacramento Petroleum Association for contributions to the article

Ridge Dorsey

Ridgely was born in Syracuse New York, on Oct 25, 1931. After high school, he studied at Syracuse University until his Naval Reserve Unit was called up for the Korean War. He spent the next two years in the Southeastern U.S. eventually landing on a marine training vessel called an LST, a "Large Slow Target" as he used to call it. After his run with the Navy, the GI Bill allowed Ridge to attend and graduate from the University of Washington with a Bachelor of Science in Geology, where met "the love of his life" Sylvia.

After early assignments with Shell Oil in Bakersfield and Ventura, Ridge joined Tenneco in Bakersfield in the late 1960's and remained in Bakersfield the rest of his life. He later worked for SSI, STA, Combs and Assoc., Bechtel at Elk Hills until retiring in 1998, and fully retiring in 2000. He also had a consulting business. Ridge and Sylvia lived in the same house in Bakersfield for 44 years. Ridge was a long time member the of San Joaquin Geological Society, and was an unforgettably colorful character and a genuinely nice person.

Once retired he spent time passing on his vast knowledge of geology at the Buena Vista Museum of Natural History and the Bakersfield Museum of Art. At each of these places, he entertained folks with his "Ridgeisms" such as "Great Piles of Schistosity!", "Flinkinger Anticline!", "Think Like a Sand Grain", "Arthur (speaking of Arthritis) and his whole family have moved in..." and many others.

Ridge leaves behind his wife Sylvia, and two sons Edward and John, and their families.

This article contains information from an obituary written by Ridge's longtime friend Malcolm Allen and an obituary in The Bakersfield Californian.

ABOVE: Ridge doing fossil restoration at Buena Vista Museum of Natural History. He was an excellent restorer, and paid great attention to the often tedious work of removing matrix from teeth, bones and other fossil material. But for Ridge, there was always a "thrill to the hunt" to find what was behind the next clump of silt. His favorite finds included the tiniest of shark teeth. He always had a smile and a joke...a "Ridgeism" to share.

-The Editor

Editors Corner • Tim Elam

Rocky Reifenstuhl

Rocky Robert Reifenstuhl, longtime field geologist and legend in the annals of extreme racing in Alaska, died in Salt Lake City on 31 January 2014 at the age 61 while awaiting a heart transplant. Rocky was a field geologist with the Alaska Division of Geological & Geophysical Surveys (DGGS) for 27 years before his retirement in 2009.

Rocky grew up in rural New York State and graduated from West Virginia University in 1976 with a BA in Geology. After auditing a few graduate courses at Cornell, he was lured to Alaska by a spirit of adventure and the fact that his older brother, Steve, had also moved there. In 1977, while working for the U.S. Forest Service in Ketchikan, Rocky met Gail Koepf, beginning a lifelong relationship and marriage. Rocky and Gail had two daughters, Alexis and Kirsten, who both live with their families in Oregon.

Throughout his career, Rocky published his maps and stratigraphic and petrographic studies through DGGS. The productivity reflected by his publications record is impressive by any standard. Rocky is senior author on 10 geologic maps and a contributing author to an additional 38 maps. He is the lead author for 29 reports and technical papers and a co-author on an additional 27. Rocky presented more than 32 technical presentations at Geological Society of America (GSA), American Association of Petroleum Geologists (AAPG), Alaska Geological Society (AGS), and other meetings and coauthored more than 31 additional presentations. His professional affiliations included GSA, AAPG, and AGS. He also served as president and board member of AGS and was an adjunct professor at UAF. Rocky's persona as an iron man in the field was in sharp contrast to his image at society meetings and special occasions, where he was the epitome of an articulate, professional geologist.

EDITOR'S NOTE: This "In Memoriam" is only a small part of a tribute to Rocky Reifenstuhl, taken from the Alaska Geological Society Newsletter, April 14, 2014 issue.

EDITORS CORNER

Okay, who hasn't been busy this Spring? Raise your hand? Anyone? Everybody's been busy? I thought so.

This issue was intended to provide complete PSAAPG Convention coverage. It doesn't. I stuffed as much stuff as I could into this 32 page full-color edition, but I couldn't fit everything that was submitted. That's a pleasant crisis. Please be aware that in the July-August issue, there will be photos of all Convention vendors, all Convention field trips not covered in this issue, all PSAAPG scholarship winners not in this issue, programs at the California Oil Museum, a San Joaquin Valley oil field article (the field is secret for now) by Scott Hector, and more.

I am thankful to have non-Convention articles from Jean Kulla, Dirk Baron, and John Armentrout in this issue, plus PSAAPG election candidate information supplied by Tony Reid. Thanks to all folks who submitted photos, particularly Stefano Mazzoni and Noel Velasco who provided more than 50 Convention photos each.

Congratulations to the Imperial Barrel Award winning team from San Diego State University at the PSAAPG competition. The event, held March 21 at AERA in Bakersfield, was excellent again this year. California State Univ.- Bakersfield, Long Beach State, University of Alaska-Fairbanks, and University of California, Santa Barbara were also well-represented by their IBA teams.

Van Couvering Award winners (see picture page 15):

- From CSU Bakersfield: Kelly Harrington, Martin Jiminez, Alyssa Kaess, Zachary Martindale, Diem Nguyen, Janine Rosa
- From Fresno State: Christopher Bowie, David Oliver, Alex Pytlak, Saint Joseph Thao
- From CSU Northridge: Brian Lee Clements, Jasmine Nolasco, Daniel Tentori

Honorary Membership

Honorary Life Membership is the highest award given to PSAAPG members. It is bestowed upon members who have distinguished themselves by their contributions and devotion to the science and profession of petroleum geology and by their outstanding service to the Pacific Section. In 2014, two members were chosen for this award: Bob Hoffman and Tony Reid. They were presented their awards by Honors and Awards Committee Chair Bob Lindblom and PSAAPG President Dan Schwartz.

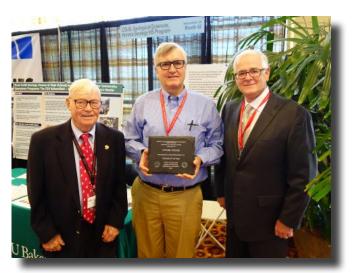

Bob Hoffman receives the Honorary Membership Award from Bob Lindblom, left, and Dan Schwartz, right.

Distinguished Service Award

The Distinguished Service Award is given to PSAAPG members "in recognition of singular and beneficial long-term service to the Section and/or affiliated societies. The term singular does not mean without precedent, but rather the activity is specific as distinguished from general service." This years' honorees are Bonnie Bloeser, AERA Energy, Tim Elam, Chevron (retired) and Cynthia Huggins, AERA Energy.

Student Q & A Panel: The Transition- Academia to Industry

For the second year in a row a Student Q&A Panel was held at the PSAAPG Convention. Last year's panel was very well received in Monterey. This year we decided to focus more on the topic "The Transition- Academia to Industry." Many students are preparing to graduate and are anxious to know how to bridge the gap from being a geoscience student to a professional geoscientist. 94 students registered for the event. The students had the opportunity to submit questions when they registered for the event. The panel consisted of Jean Kulla, a consultant from the Los Angeles basin area, Scott Kenyon, a recent graduate of CSULB and new hire for Chevron, Lee Krystinik, AAPG President, Jan Gillespie, a professor from CSUB, and Mark Maroun, a graduate of SDSU and geologist for Aera. The panel had a wide variety industry experience with work in Research and Development, exploration, production, and consulting. They also had a range of degrees in geology, including MS and PhD.

The panel answered questions that were submitted online in addition to questions that developed in discussion. Questions ranged from "What type of student involvement are companies looking for," to "Is it better to start grad school right after undergrad, or is it better to gain work experience?" The panel answered questions about what recruiters are really looking for and what students should know before their next interview, how to get that interview, and ways to successfully transition into the corporate environment.

YP- Speed Mentoring

Directly following the Student Q&A Panel was the popular Young Professional (YP) Speed Mentoring. Many of the students and panel stayed after the Student Q&A to participate in Speed Mentoring. It provided the opportunity for students and early career geologists to mingle and pick the brains of industry professionals with various amounts of experience in a less formal setting. Students hopped from table to table taking advantage of so much experience in the room.

Student Fieldtrip (Field Trip #8)

At this year's field trip we provided an inside look into two service companies...very important components of our industry.

Students were given tours of Schlumberger's Tool Shop, where they were able to see logging tools up close and in person (see photos on next page.) They were given brief theory on the many tools, practical tool applications, and demonstrations of how the tools open/close downhole. They also got to see how the sidewall core guns and conventional core barrels function and what the inside of a logging truck looks like. Schlumberger generously provided lunch and talked with the students about what types of jobs are available for students with both a BS and MS in geology.

After lunch the fieldtrip continued to Core Lab. They were given a full tour of the facility. They saw 1) where core is cut in the workshop, 2) where core is CT-scanned, 3) where core is photographed, and 4) the many analyses that Core Lab provides. Earlier in the day, a Core Workshop was also held at Core Lab. The students were fortunate enough to have two local geologists stay after the Workshop and discuss core from local fields during the field trip. Emily Fisher of Aera showed core from the Midway-Sunset Field, and Larry Knauer of Chevron showed core from the Kern River Field.

It was a great way for the students to see how subsurface data is collected and what happens to the rock once it's pulled out of the ground. A big thank you to Masood Khan and Will Turner from Schlumberger for the tour and for providing lunch. Also, thank you to Linda Specht from Core Lab for allowing the students behind the scenes, and to Emily Fisher and Larry Knauer for sharing your core with the students.

EDITORS NOTE: This article was submitted by Becca Lanners, who is the Pacific Section Liasion to Student AAPG Chapters and was on the Convention Committee, charged with organizing Student Volunteers and Activities.

Making Unconventional, Conventional

PetroFecta® from Fluid Inclusion Technologies

is a unique approach combining XRF (**PDQ-XRF**®), Trapped Fluid Analysis (**FIS**®), and High Resolution Photography (**RockEye**®) of the entire wellbore from well cuttings or core samples of any age.

All analyses are conducted on the same 1 gram sample (up to 575 samples per well) with an analytical cycle of four days.

Data provided on a DVD with previewer software.

Information about PetroFecta® and other FIT services, call 918.461.8984 or visit www.fittulsa.com

Kern High School District/Cal State Univ. Bakersfield Geology Partnership • Dirk Baron

In the May-June 2013 issue of the *Pacific Petroleum Geologist*, a new Dual-Credit Geology program, administered through Cal State Bakersfield and the Kern (County) High School District, was highlighted. The program continues to be successful, as the 2013/2014 classes wrap up. 350 students at South, Ridgeview, North, Arvin, Frontier, and Highland High Schools in Kern County participated in the program this school year.

The program was featured as a national "best practices" model at a recent National Science Foundation workshop on Broadening Access in the Earth and Environmental Sciences. Also, the KHSD-CSUB group organized a Topical Session on the classes at the 2013 Annual Meeting of the Geological Society of America. Support from Pacific Section AAPG was recognized at both events.

For 2014-2015, new classes with the same number of students at the same schools are scheduled. In fall 2013, 11 of the 30 new Geology majors at CSUB came through the Dual Credit program classes.

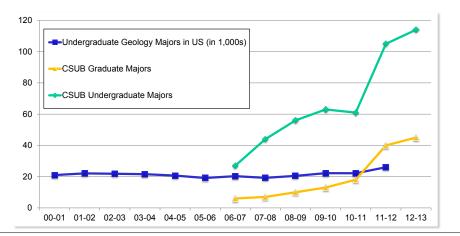

The CSUB-KHSD team at the 2013 GSA meeting in Denver.

PSAAPG Teacher of the Year Steve Kiouses, second from left, with CSUB's Dirk Baron, left, and three Ridgeview H.S. Geology majors-to-be at CSUB.

Dual Credit students on a Geology field trip to see Kern River Fm. sands.

Graph to the left shows Earth Science enrollment is increasing after years of stagnant growth. The yellow and green curves show the trend is amplified at CSUB.

Southern California Geology Adventure

Here in SOCAL we are known for a lot of things including: traffic, crowds, and earthquakes. At the risk of divulging a very well-kept secret, we also have a geology paradise. No, I don't mean the Miocene Monterey or the San Andreas fault, but have you heard about Anza-Borrego State Park? There is no traffic, no crowds, and just a few earthquakes. The geology is varied and spectacular; and it is only a few hours drive from LA or the OC (Orange County).

Anza-Borrego Desert State Park is the largest state park in the world made up of 634,000 acres. The varied geology includes: meta-sediments and volcanic related to mountain building activities and wonderful sequences of conglomerate, breccia, turbidites, and fluvial-deltaic and tidal sediments related to the complex deposition related to the opening of the Gulf of California. Particularly interesting are Upper Miocene sediments of the Split Mt. Group. Enjoy the photos below.

FIGURES 1,2 Split Mountain (above two photos) shows a beautiful sequence of sediments derived from the Colorado Plateau and deposited into the 'proto' Gulf of California.

FIGURES 3, 4
Love those sedimentary structures indicating flow regime and the depositional environment. Geophysicist Ted Koelsch (above & right) is the 6-foot tall scale.

FIGURE 5 Close up of breccia (in Figure 6).

FIGURE 7

The 'badlands' show another character of the geology in the park. The author is standing at Font's Point looking out over Plio-Pleistocene age Borrego Formation.

FIGURE 9 Beautiful fold (at left) shows the heart of the Split Mountain anticline.

Formation Evaluation Specialists

We have a lot happening at LABGS in the next couple of months and are looking forward to our great speakers, special events, and awarding PSAAPG/LABGS scholarships to some bright and deserving SOCAL college students.

Meetings and Speakers

At our March meeting, Dr. Robert Anderson from the Jet Propulsion Laboratory in Pasadena, CA. gave a very interesting presentation on the geologic history of Mars. (See Figures 1 and 2 at bottom of page.)

We are looking forward to our meeting on May 22, Glen Sharman will be presenting "Zircon Indications for Offset of the San Andreas Fault."

Additionally in May we will be awarding scholarships from PSAAPG and LABGS to the following students:

<u>From CSU-Long Beach:</u> Michael Thompson; Yannick Wirtz; Amar Rao; Derik De Baun; Sara Price; Brendan Neel; Scott Brito; Jennifer Leidelmeijer; Georgeanne Aronson; Kristen Faulkner; and Benjamin Davidson.

From CSU-Fullerton: Peter Kloess; Edween Hernandez; Daniel Philo; and Kelly Shaw.

From UC-Riverside: Alexander Valentine and Evelyn Becerra.

From Occidental College: Robin Bruns.

Congratulations to all!

On June 26, LABGS is very proud to have our very own – and always distinguished Don Clarke, who will honor us with his AAPG Distinguished Lecture "Hydraulic Fracturing and Earthquakes: Ethically, How Do We Move Forward and Do the Right Thing?"

The Students are the Future

Within the past year or so, some very bright and hardworking geology students at Cal State – Fullerton have been in the process of reviving the AAPG Student chapter. I was very pleased to be invited to an April 16th Q&A meeting of the student chapter at Cal State – Fullerton. Over twenty geology students participated in the Q&A, which lasted about two hours. They asked questions about working as a geologist for oil/energy and for environmental companies. Also, we had a lively discussion of what we as professionals can do to help students find out more about careers in industry and how to better connect (ie. network) at meetings. Do any of us remember when we were students, how intimidating it was at meetings to go up to the 'pros' to introduce ourselves and try to start a conversation? I challenge every one of us to make it a point at the next meeting we attend to engage at least two to five students in meaningful conversation – go up to them, introduce yourself and start talking about what you do!

Figures 1, right: Dr. Robert Anderson, NASA Jet Propulsion Laboratory, speaks to LABGS about geologic discoveries on Mars.

The University of Oregon Geology Club has organized an AAPG Student Chapter and submitted an application for formal recognition to AAPG-Tulsa.

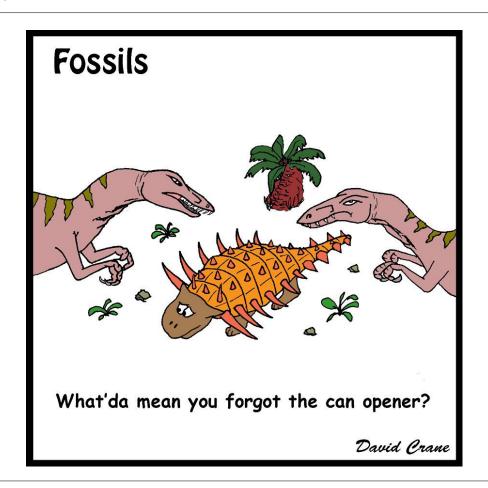

Thirteen students have applied for Student Membership in AAPG, and have elected officers for a Student Chapter under the mentorship of David Blackwell as Faculty Advisor. David, a member of the University of Oregon Geoscience Department faculty, has been the leader in this initiative and the students have exhibited enthusiasm about envisioning potential career direction in petroleum geology. Sponsorship is by Northwest Energy Association, Jim Jackson, Acting-President. NWEA is an affiliated society of the Pacific Section AAPG.

In reality, it was your correspondence on behalf of Pacific Section AAPG this past Fall that got this effort started. Inquiries at Oregon State University, facilitated by Al Niem, have identified possible faculty support and it is hoped that this next year a Student Chapter can be formed in Corvallis. Preliminary contact with Washington State University has been made with identification of one past AAPG member that might be a sponsor/advisor in Pullman.

Northwest Energy Association is pleased to have been a participant in this effort on behalf of the Pacific Section, and will continue to work toward Student AAPG Chapters at each of the four major Pacific Northwest Universities in the coming academic year.

Best regards,

John M. Armentrout

NEXT Newsletter Deadline

(July/August Issue): July 1st, 2014

Alaska Geological Society

May 15 8:30-4:30 Alaska Geological Society Technical Conference, University of Alaska, Anchorage.
 KEYNOTE SPEAKER: David LePain, Alaska DGGS, "Geologic Framework of Cook Inlet Basin, South-Central Alaska: The Depositional Systems Perspective.

Coast Geological Society

- May 20 Meeting: SPECIAL ANNUAL AWARDS DINNER; Program: "Tectonic Geomorphology of the Santa Barbara - Gaviota Coast;" SPEAKER: Dr. Ed Keller.
- June: No meeting; Recess for Summer

L.A. Basin Geological Society

- May 22 Meeting: "Zircon Indications for Offset of the San Andreas Fault;" SPEAKER: Glen Sharman
- June 26 Meeting: AAPG DISTINGUISHED LECTURE: "Hydraulic Fracturing and Earthquakes: Ethically, How Do We Move Forward and Do the Right Thing?" SPEAKER: Don Clarke, Consultant.

Northern California Geological Society

- May 28 Meeting: SPECIAL 70th ANNIVERSARY DINNER MEETING: "Why Don't Vertebrates Care About Mass Extinctions;" SPEAKER: Dr. Kevin Padian, Professor and Curator, Department of Integrative Biology and Museum of Paleontology, University of California, Berkeley
- June 25 Meeting: TBA; Last meeting of the season

Northwest Energy Association

<u>May 15 Meeting</u>: "Update of the Jackson Prairie Storage Facility;" SPEAKER: Bob Pinotti, Senior Geologist, Jackson Prairie Gas Storage, Puget Sound Energy.

Sacramento Petroleum Association

- May Meeting: No meeting
- June Meeting: To Be Announced

San Joaquin Geological Society

- <u>May 13 Meeting</u>: "STUDENT NIGHT- Research from Cal State, Bakersfield, Cal State Fresno, Bakersfield College.
 - PROGRAMS: "Characterization of Discontinuity Surfaces and Microfacies in a Devonian Epeiric Sea, lowa;" SPEAKER: Chris Bowie, Fresno State University; ALSO "Holocene-Aged Lake Sediments From The Southeastern Margin Of Tulare Lake, CA;" SPEAKER: Brandon Jackson, Cal State Bakersfield
- <u>June 10 Meeting</u>: "Geysers Greywacke reservoirs, altered caprocks, and more!" SPEAKER: Joe Austin,
 California DOGGR.

2015 PSAAPG CONVENTION

The Pacific Section AAPG 2015 Convention will be in Ventura/Oxnard California, May 3-6, 2015, at the Embassy Suites- Mandalay Bay in Oxnard. Convention Chair Joan Barminski welcomes inquiries and involvement; her contact address is joan.barminski@boem.gov.
